

- Add stand to upper base housing

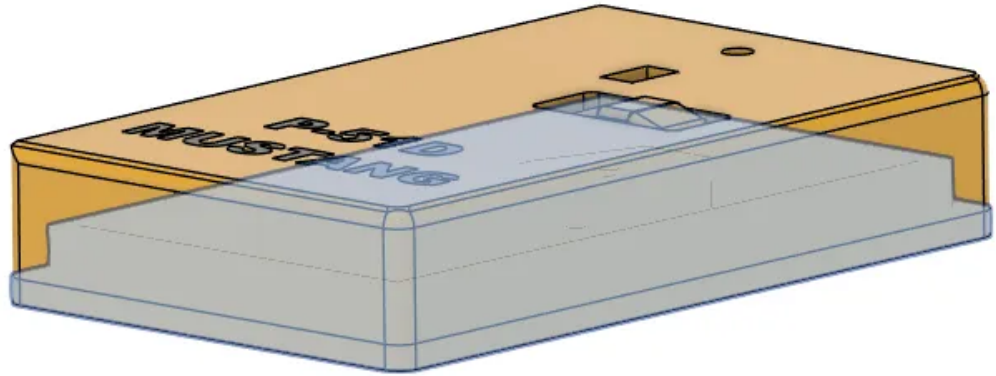

- Mount LEFT HAND fuselage to the stand

- Route wire through fuselage tunnel. Connect to electric motor.

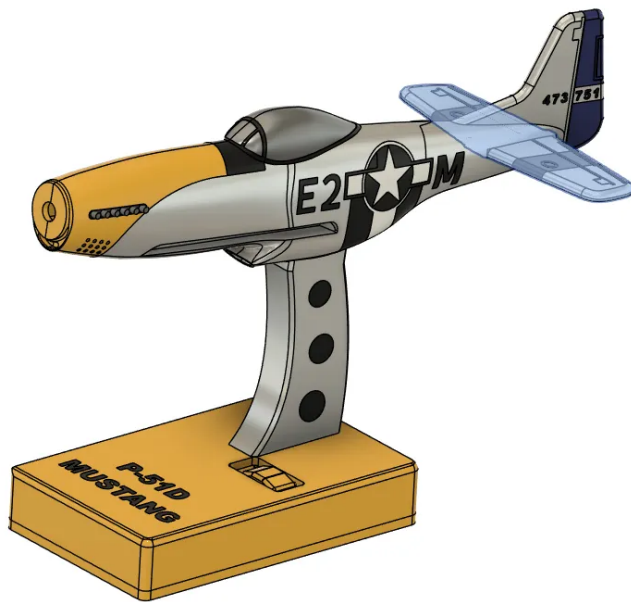

- Adjust wire at base housing
- Add battery and close lower base housing to close out the base.

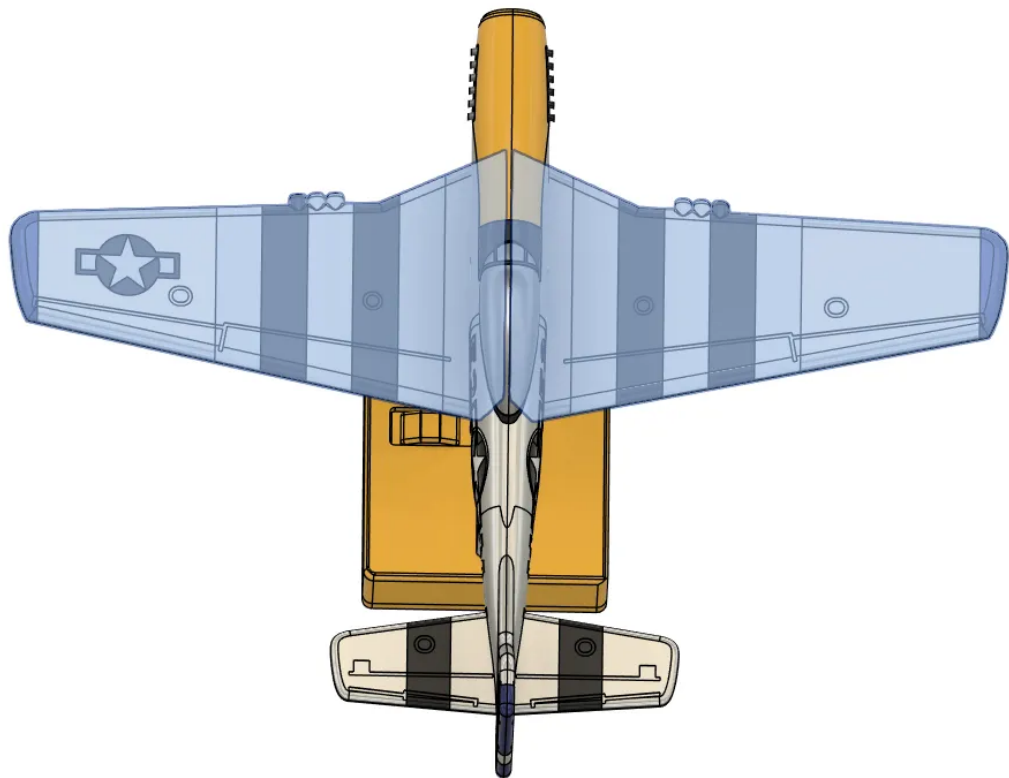

- 
- Install RIGHT HAND fuselage with connector

- Install horizontal tail

- Install wings (press forward end of wing into the fuselage slot first. Then push in the aft end of the wing into the fuselage slot)

- Install propeller onto electric motor

- Enjoy!
