

## V-22 Assembly

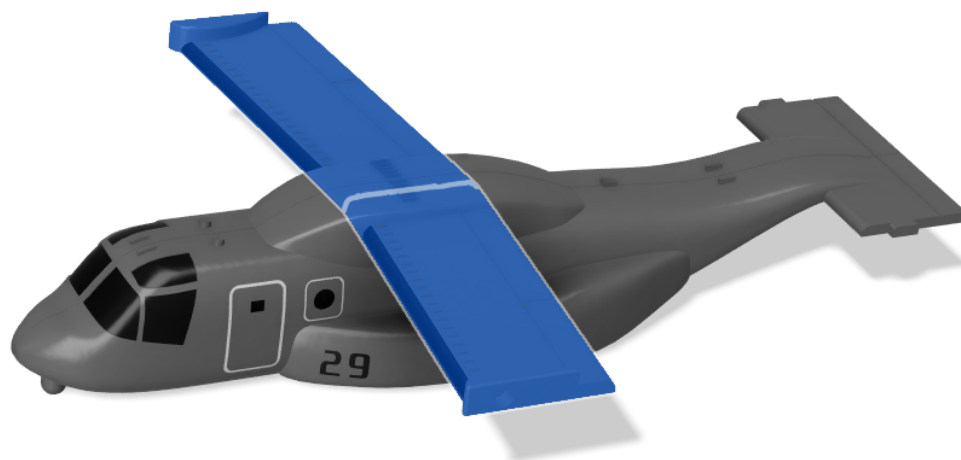

- Remove all pieces from the kit
- Debur as needed to smooth edges
- Insert fuselage connectors

- Connect both fuselage halves

- Insert wing into fuselage slot. Note that the wing is swept FORWARD

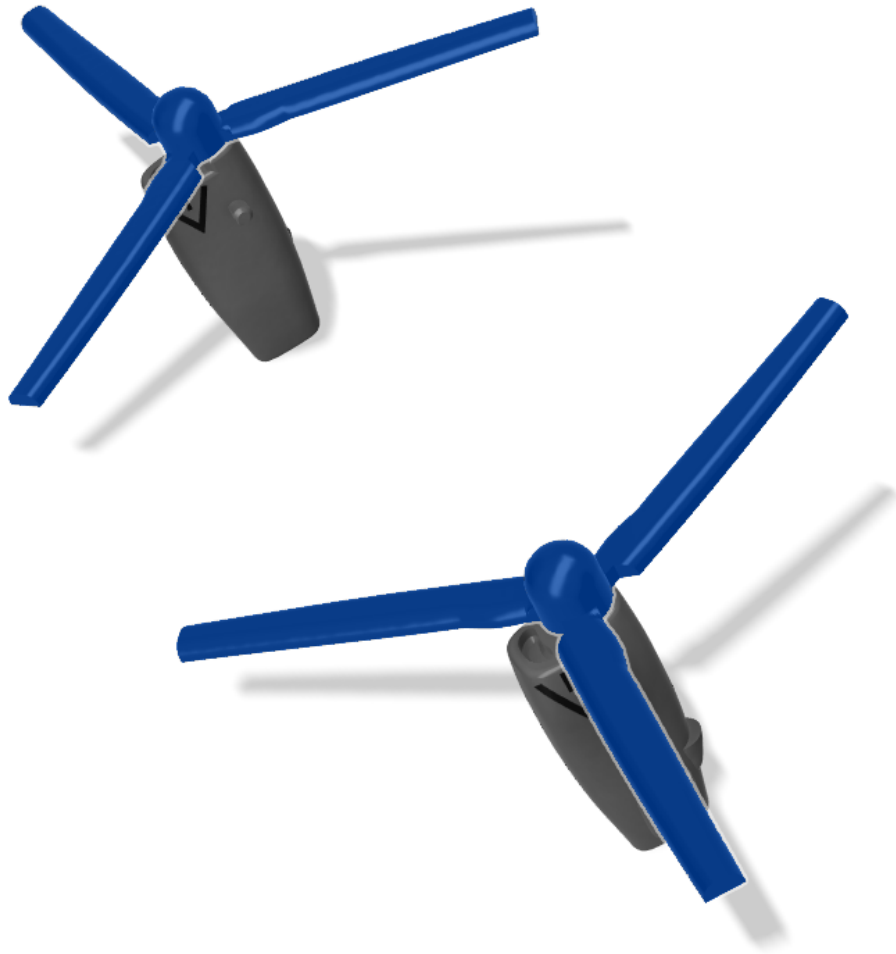

- Insert engine connector (smaller) into the top engine half. Repeat for the opposite side.

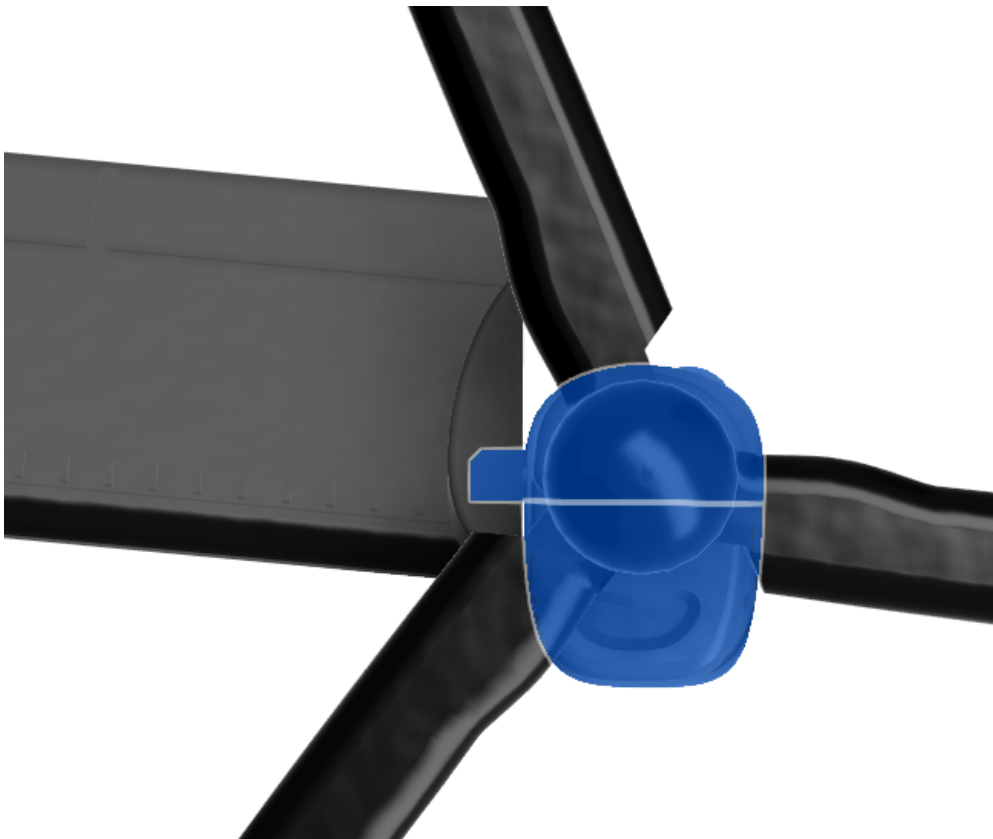

- Connect upper and lower engine halves together. Repeat for the opposite side.

- Connect rotor to each engine assembly

- Connect engine & rotor assembly to the wing

- Connect vertical tails to the fuselage

- Add base and stand

- Enjoy!
